

## SVS - 106 Standard Range/Single Camera Only

6" LCD Colour mirror monitor that clips directly onto most vehicles existing rear view mirrors. This model can only have 1 camera and is designed to only come on with reverse gear. Like our 103 model this kit is also ideal for smaller vehicles with limited space for larger monitors and is better for customers that do not want mounting screws in their dash boards. 3 camera options are Square, Round or Butterfly. This model is very popular with late model vehicles and trade body builders.

### SVS-106SCK

Monitor

Square Camera

10 metre cable
