Product Overview

SVS105M 5" TFT LCD Digital Monitor

The 5" LCD Colour monitor with a dash or roof mounting bracket can be used with both a single or dual camera set-up. The large TFT LCD digital screen delivers high quality images and offers a range of settings that allows the user to customise display settings via an on screen display menu. Changing between camera 1 and camera 2 is done with a single touch of a button on the monitor and can be wired to activate with ignition or when the vehicle is placed in reverse. The 105 monitor comes with an AV input and has an LED back light to ensure good screen visibility at all times. This model is an ideal solution for all caravan and trailer applications as the stop light camera (SVSSLCW) is also compatible to this monitor.

PRODUCT SPECIFICATION

- 5" TFT LCD Digital Screen Monitor
