SVS107MMU 7.3" Mirror Strap on Monitor with Touch Keys

Capacitive touch screen buttons

Strap style mount

Product Information

Typical built in OE rear view systems can be a costly option or addition and often do not suit the addition for a second camera on a Caravan/Trailer. Introducing the SVS 7.3" TFT-LCD (Digital) Rear View Mirror Monitor. This slim line unit can automatically switch to the rear view system when the vehicle is reversing, ensuring safe driving at all times. For installation, simply clip onto existing mirror. Clip on straps are designed to fit to any size mirror with 3 camera input. Images can be cropped and when triggered will provide a second dropped image - so there are 2 images per camera with an upper and Lower image provided. Featuring a superb TFT-LCD display, these units are the perfect in-car accessory for your reversing system. The SVS107MMR has been designed with TFT glass for a clear view of the reversing image, while maintaining the reflective properties of the mirror.

Features

- **7.3" High resolution with touch keys and LED back light**
- **12V DC**
- **Neat integration into vehicle**
- **3 camera inputs (triggers)**
- **Connects with SVS100 Series rear view camera range**
