SVS210WRT 2.4mhz Wireless Transmitter/Receiver

Product Information

The SVS210WRT wireless Transmitter/Receiver combo are the next generation of the digital wireless system. This allows 200m range from the IP69 metal housed modules giving flexibility and diversity when building systems. This allows for any of the 200 Series cameras to be converted to wireless when required so you can make your system as you want with cable and wireless combinations. This simply plugs into the Camera and Monitor instead of the cable. We also have a battery pack to suit if power is an issue with the SVSBP offering a rechargeable power supply.

Features

- **IP69 Metal Housing**
- **200m line of site range**
- **11-32v**
- **Video and Audio transmission**
- **25 fps (PAL)**
- **Latency 100ms**

Specifications
